

Make Lifetime Memories.

MAKE
LIFETIME
FANS.

THE PROBLEM

01.

LONG LINES. LONG WAIT TIMES.

Long lines kill the fan experience & excitement of attending a live sports game. Some fans miss out on the action; others stay in their seat leading to loss in potential food sales.

THE SOLUTION

02.

WHY TEXT MESSAGING?

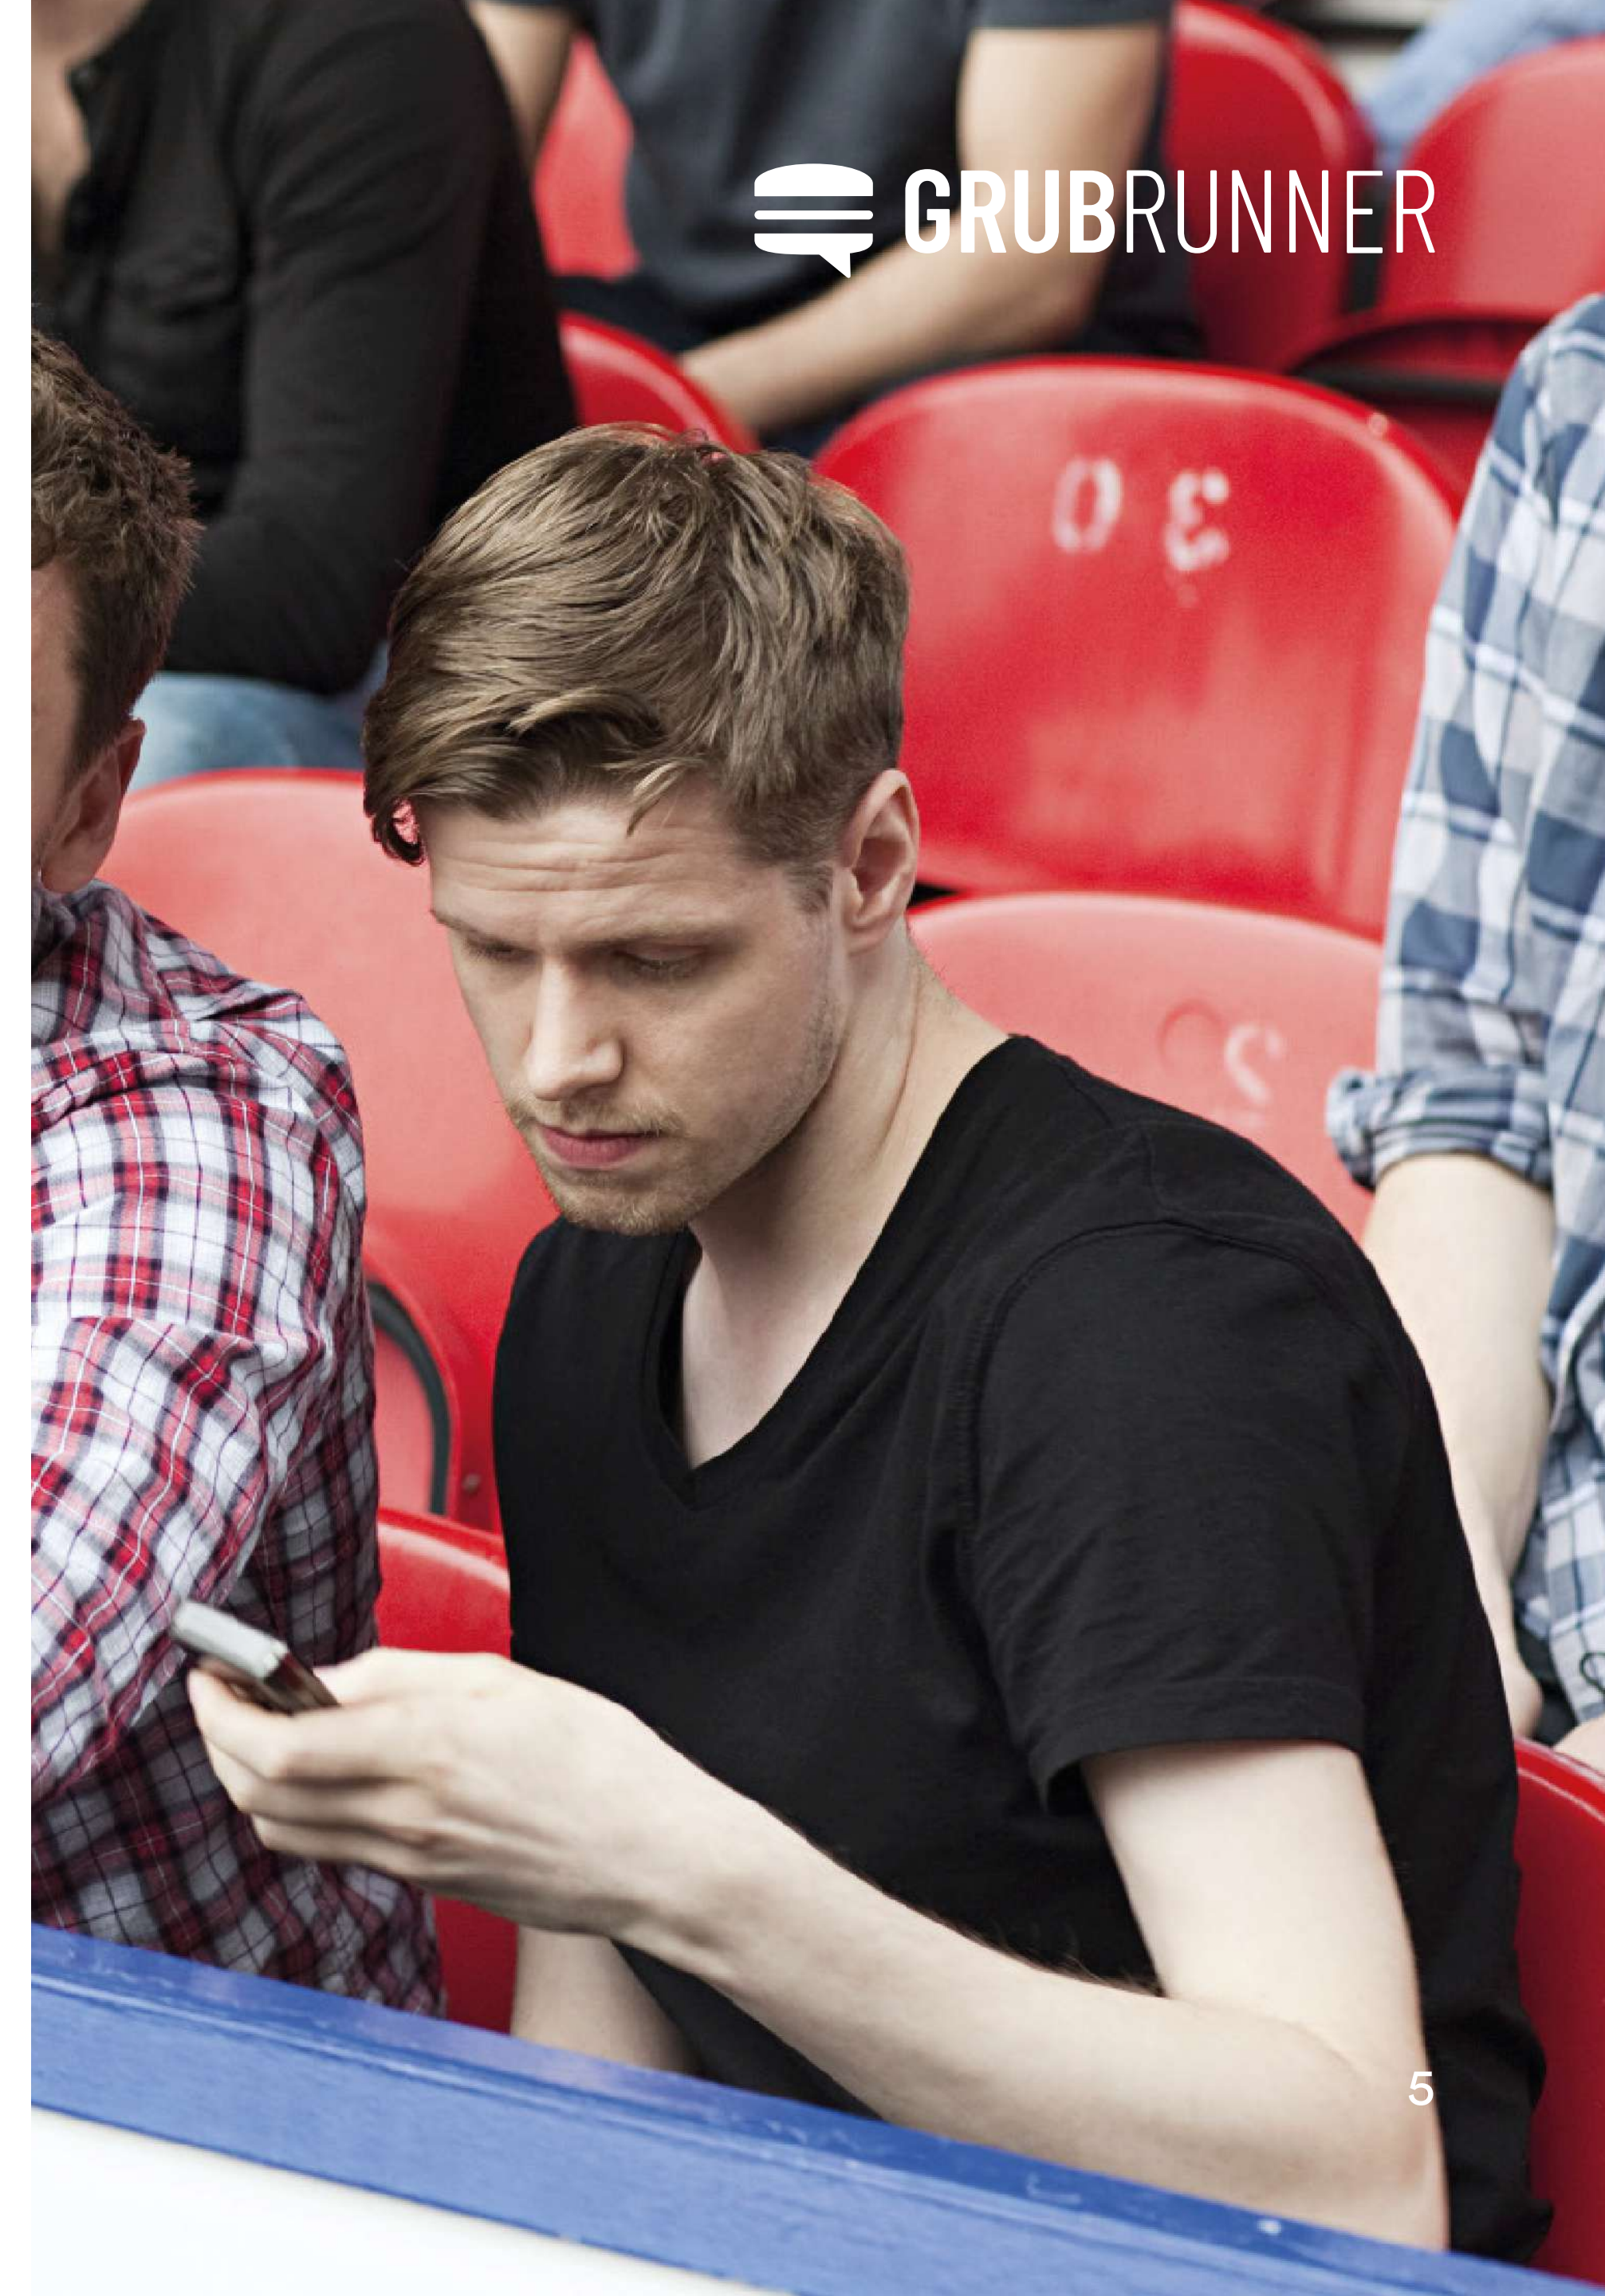

Its Fast & Reliable.

One of the major challenges of attending sports stadiums is **connectivity**.

When we first launched Grub Runner, we started off with an app and noticed the challenges of downloading and using an app in a crowded venue because of poor cellular reception.

As a result, we had to transform our service into a simple text messaging service. Unlike apps which can take 20 minutes or more to download in crowded venues, our texting platform requires limited internet access.

No downloading. No hassle. No hungry fans.

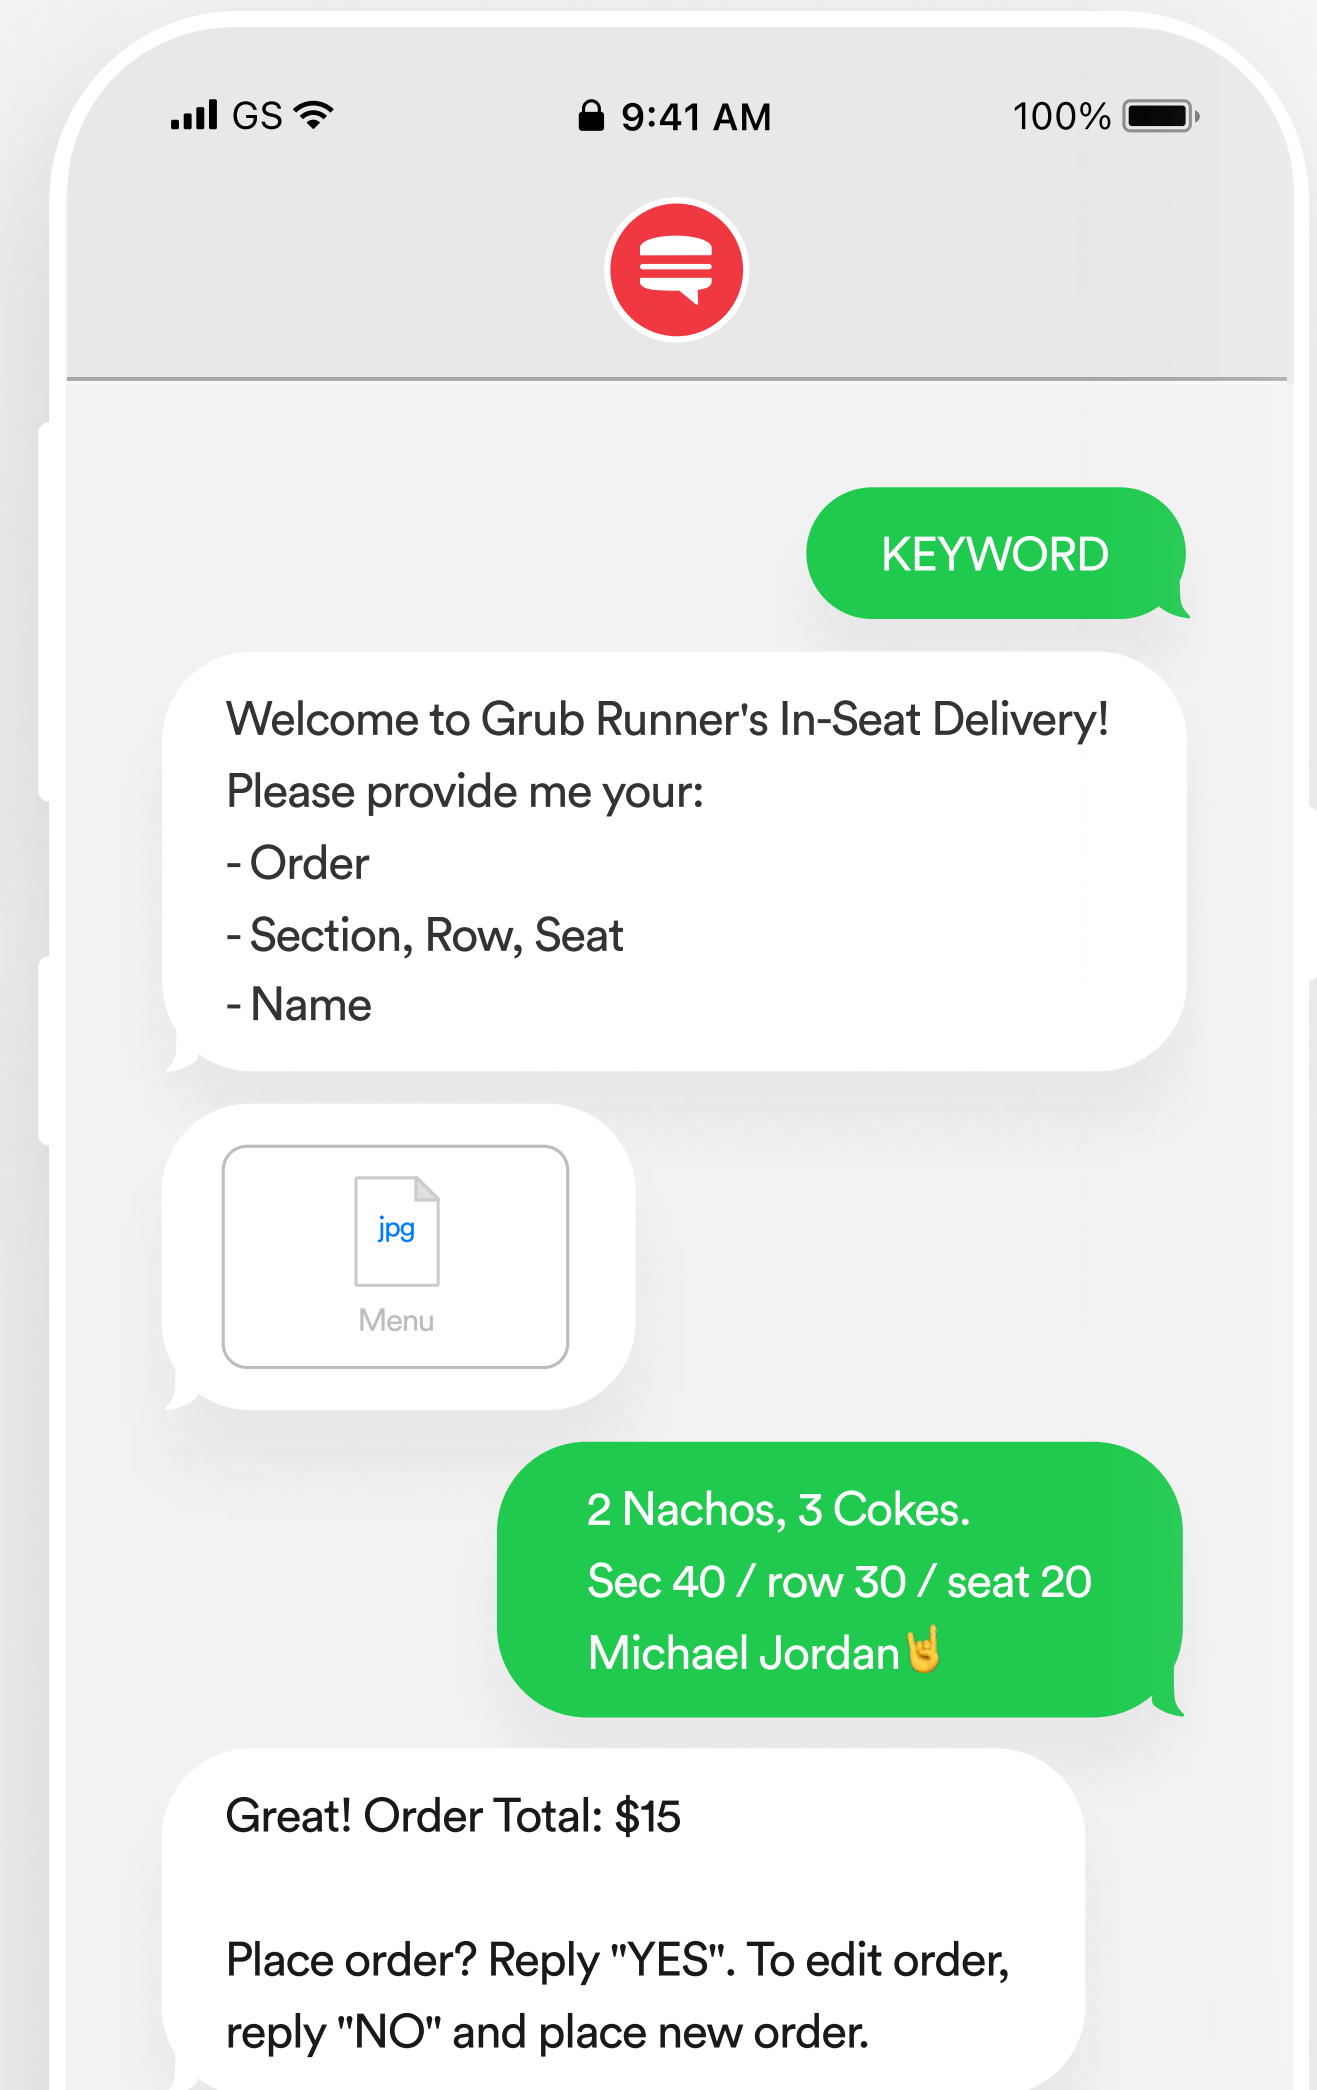

TEXT MESSAGING PLATFORM

The venue will be provided a text messaging application that will allow fans to order food & drinks on their phones from the concession stands located inside the venue via text message

HOW IT WORKS

- 1. Text Keyword:** Fans text in a dedicated «Keyword» to our dedicated number: 777-111
- 2. Text in Order:** Fans will receive a picture menu of the food served at the stadium along with an opening message asking for the fans order, seat information (Section, Row, Seat) and their name¹
- 3. Confirm Order:** Once fans text in their information, the text messaging application will provide an order summary and have them confirm the order by texting yes or no

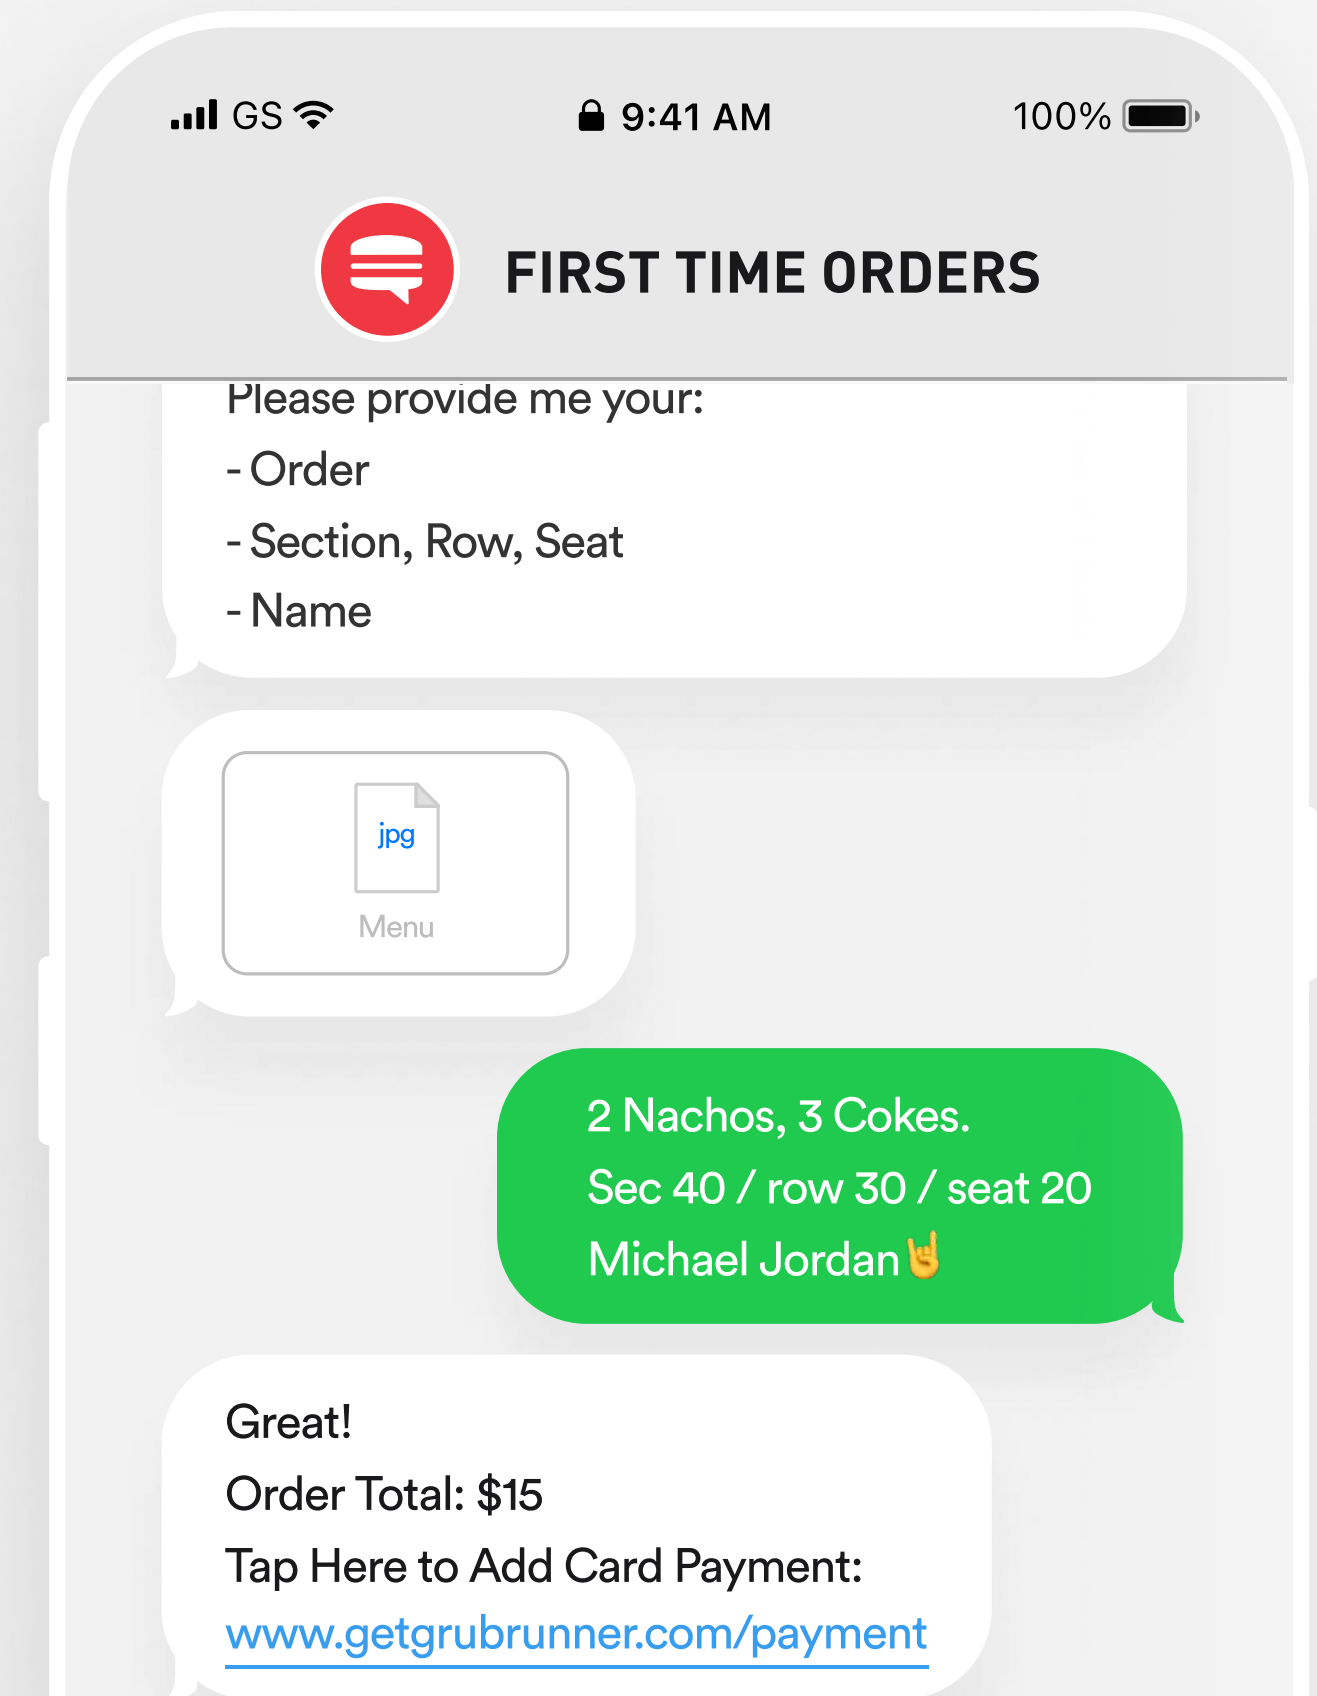

1. Only one picture menu will be able to be provided to fans and there will need to be a standard menu to service all fans

TEXT MESSAGING PLATFORM

FIRST TIME ORDERS

- **Input Credit Card Information:** When fans are texting in their orders for their first time, prior to step 3 (confirming the order) — a link will be sent to their phones to have them input their credit card information on Stripe — a third-party payment processor.
- **Future Orders:** The credit card information details will be saved as a token on Stripe — which means that customers will no longer have to input their credit card information for all future orders. The card will automatically be charged when placing second time orders
- **Credit Card Payments:** To avoid pilferage and to create a seamless experience for venues, we only accept credit card payments. We are able to process payments by all major credit card companies

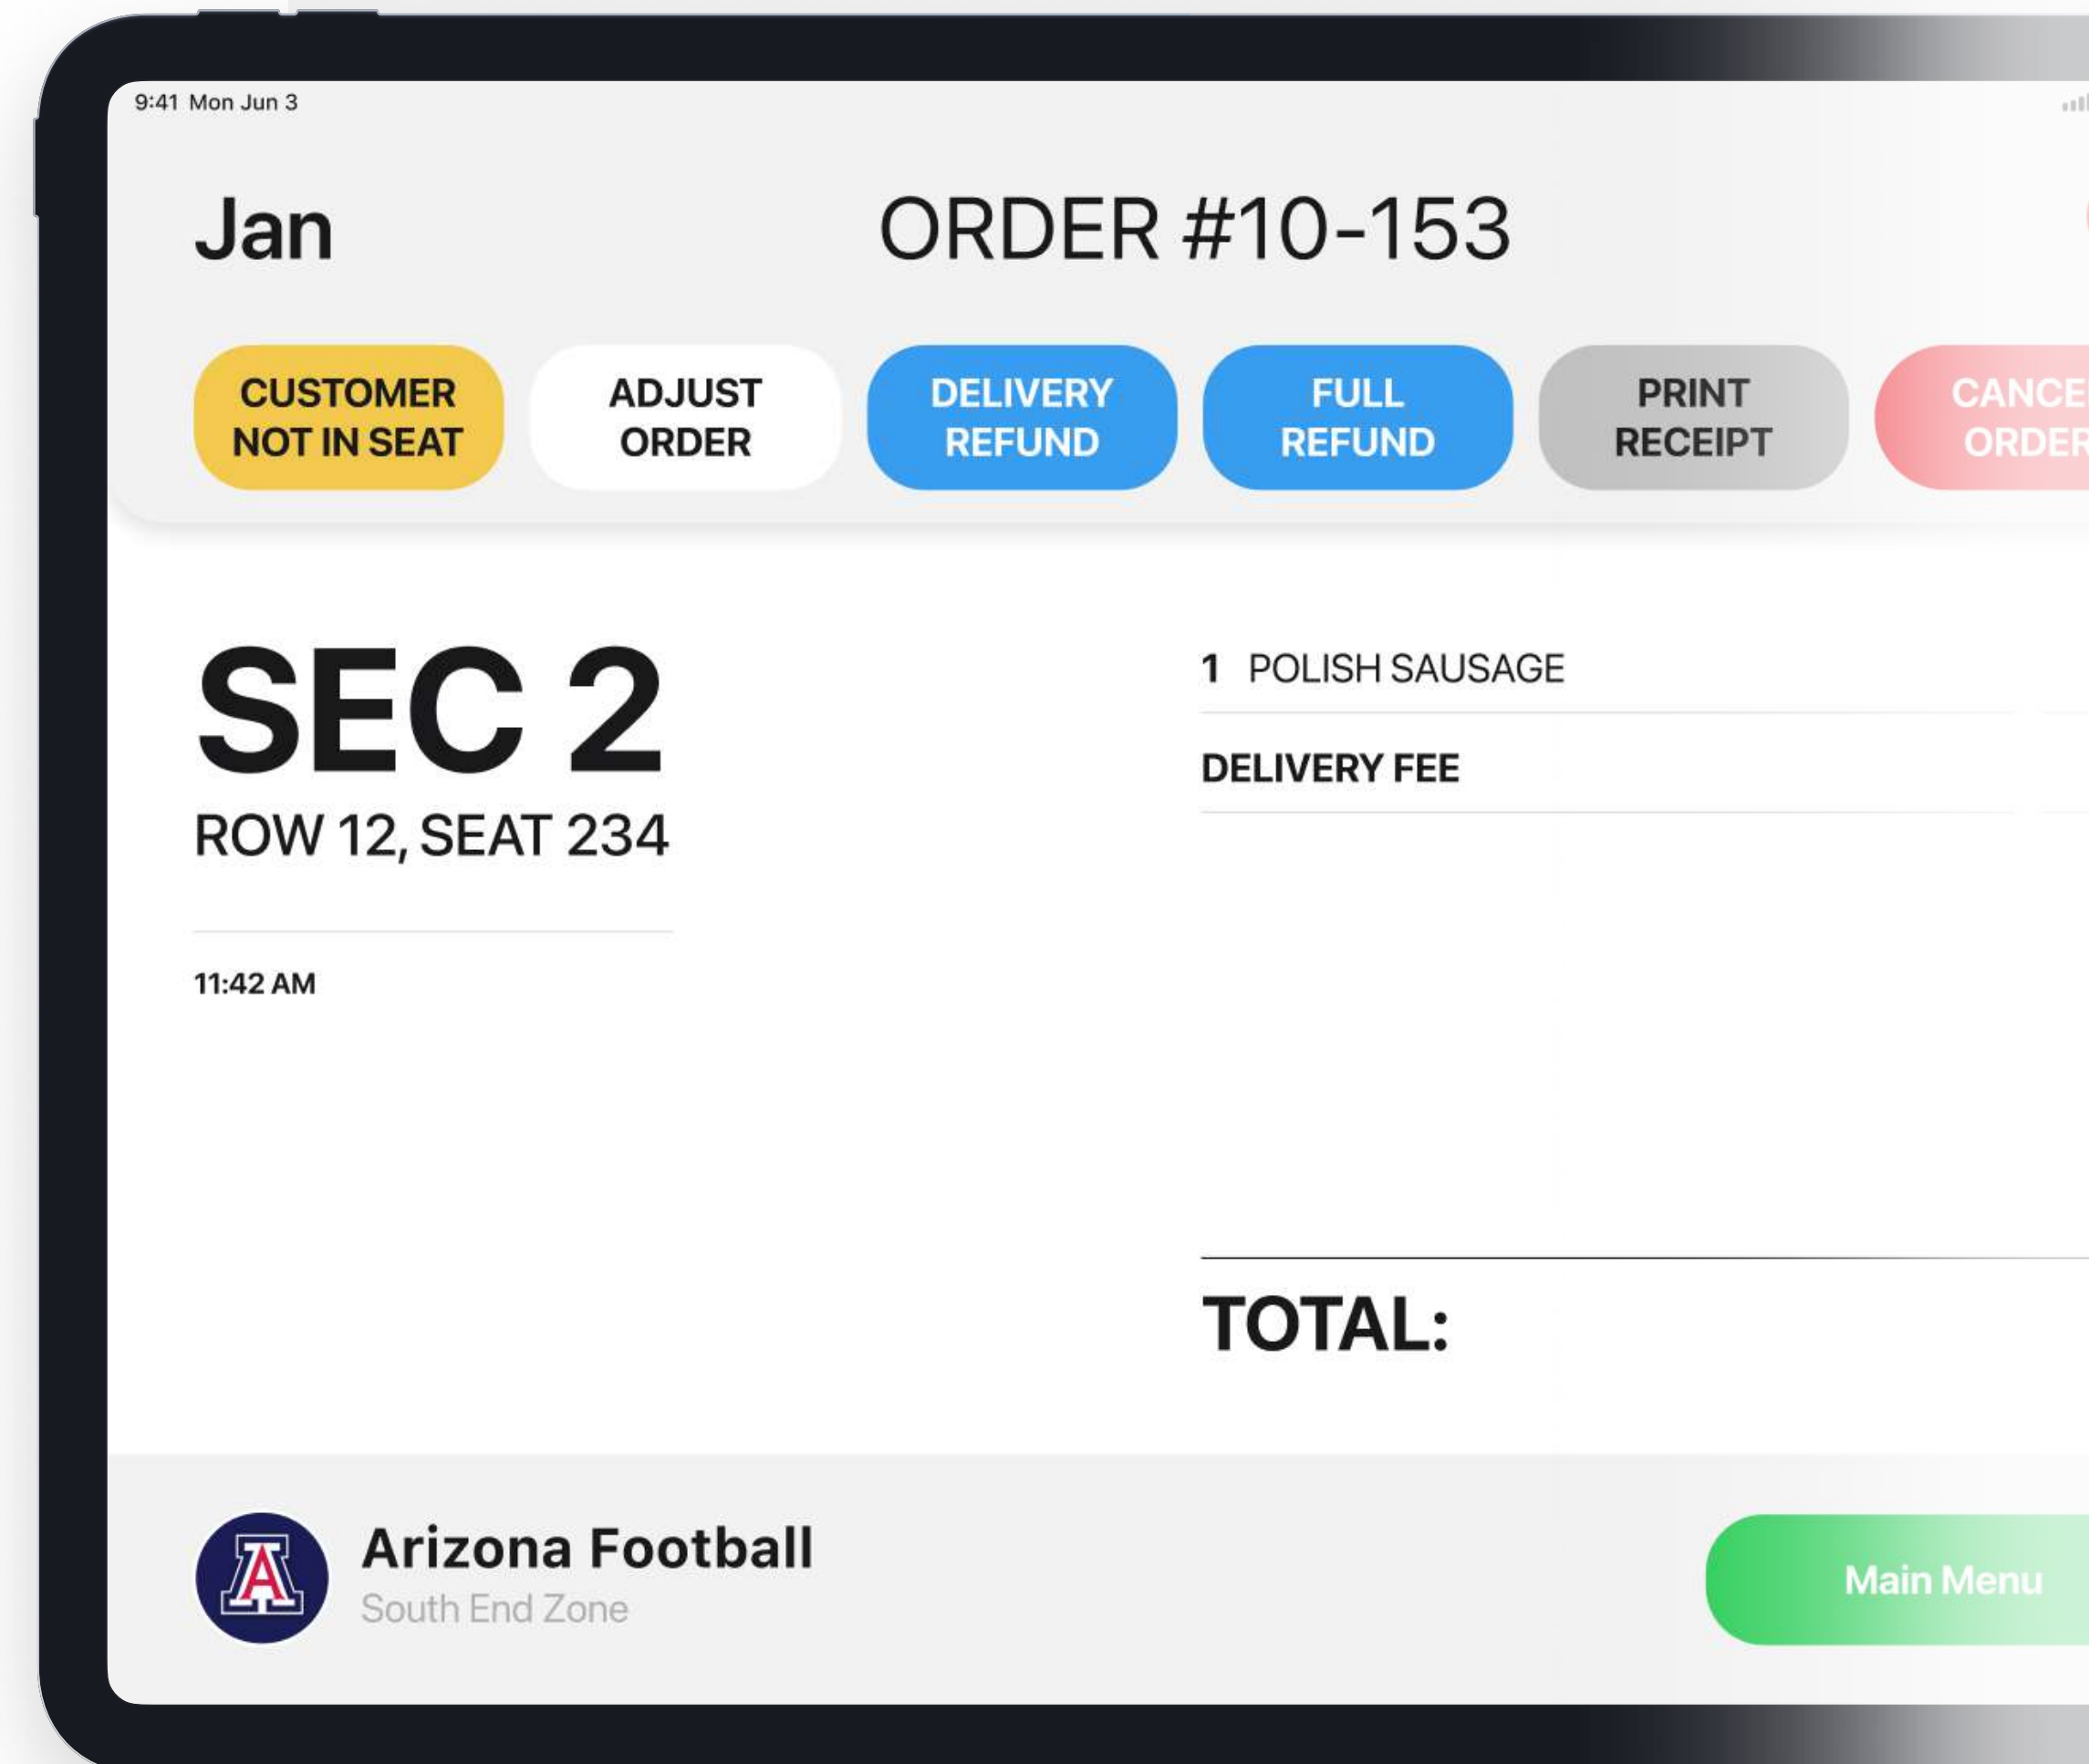

KITCHEN TABLETS

Venues will be provided a kitchen tablet to manage orders at the kitchen

TABLETS WILL PROVIDE KITCHEN STAFF THE ABILITY TO:

- Turn the Service On/Off
- Turn Menu Items On/Off in Real Time
- Adjust & Cancel Orders
- Refund Orders
- Manage Orders with Customers Not in their Seat

1 Tablet will be provided per kitchen

RECEIPT PRINTERS

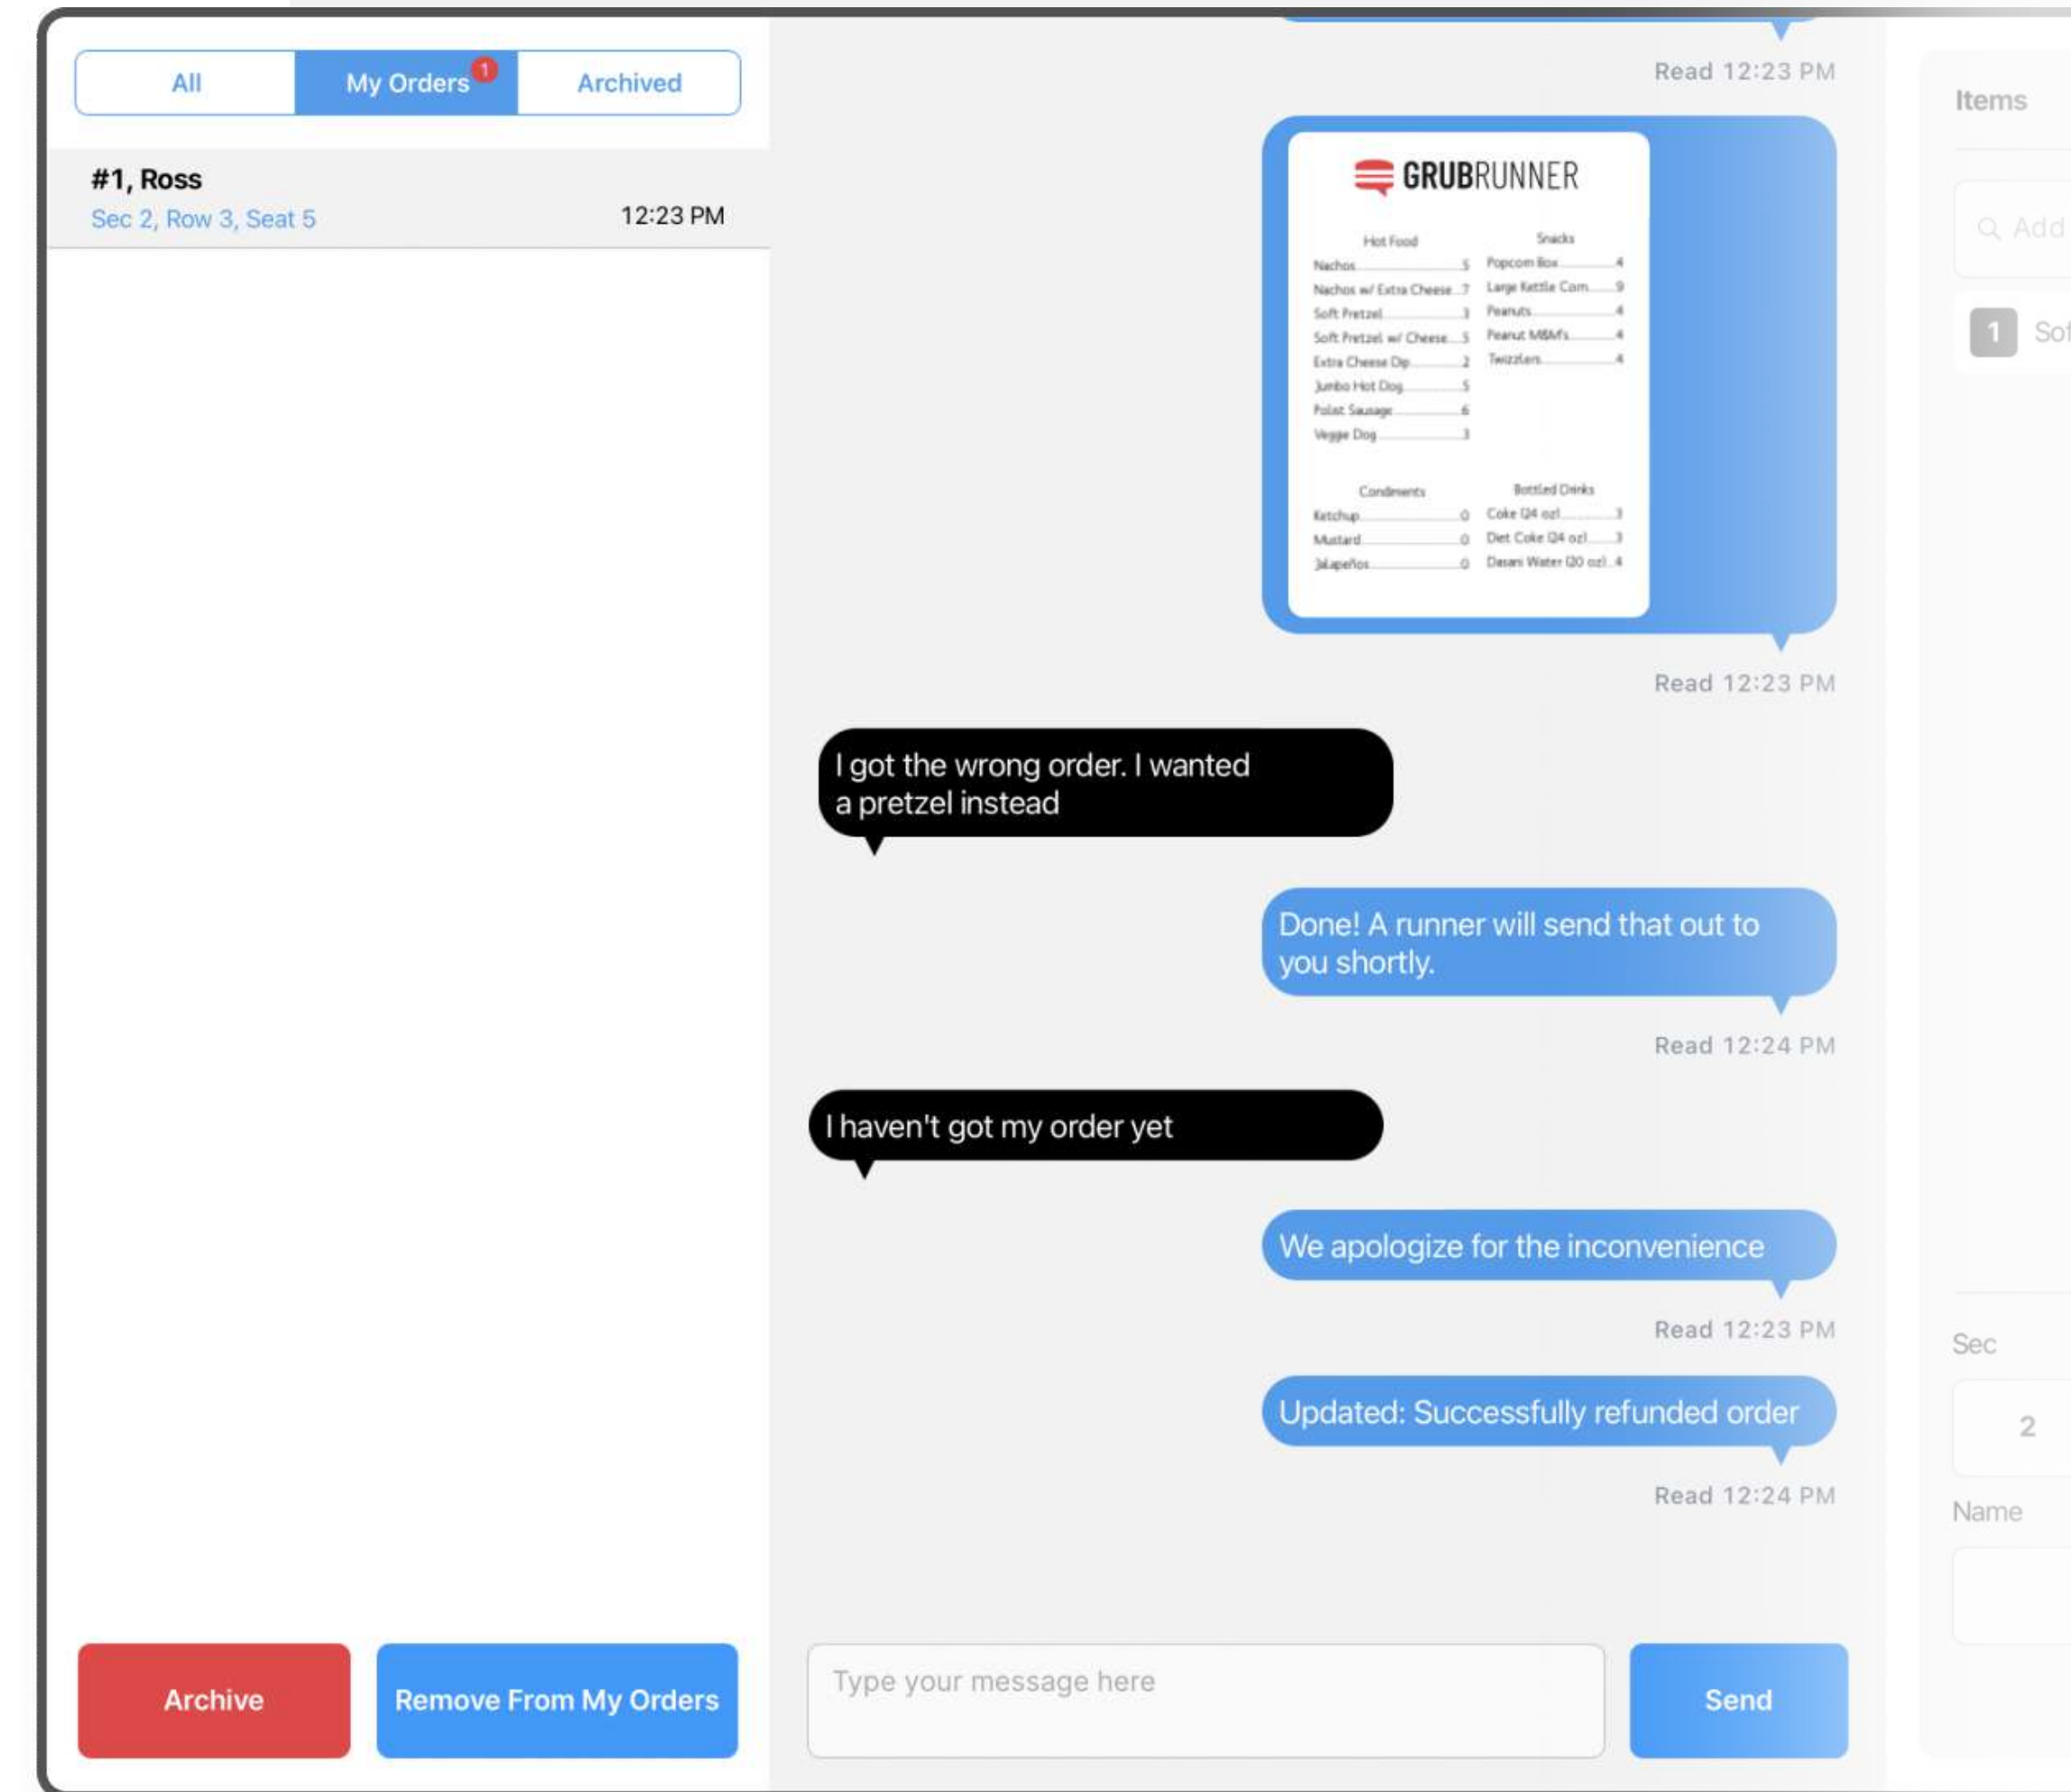

- Venues will be provided with receipt printers
- The receipt printed will not only provide information on the order, but also indicate where the customer is sitting to make it easy for runners to deliver
- 1 Receipt Printer will be provided per Kitchen

LIVE CUSTOMER SERVICE

- Live customer service via the text messaging platform will be provided to assist fans with the ordering process if orders cannot be automatically processed by the system
- Live customer service will also provided to address any customer complaints such as late deliveries, missing items, customers not in their seat, processing refunds etc.

UNIFORMS

Venues will receive runner uniforms to promote the service

THE UNIFORMS ARE:

- Neon to capture attention
- Reversible to change uniform colors to stand out in the crowd
- Easily wearable for all runners

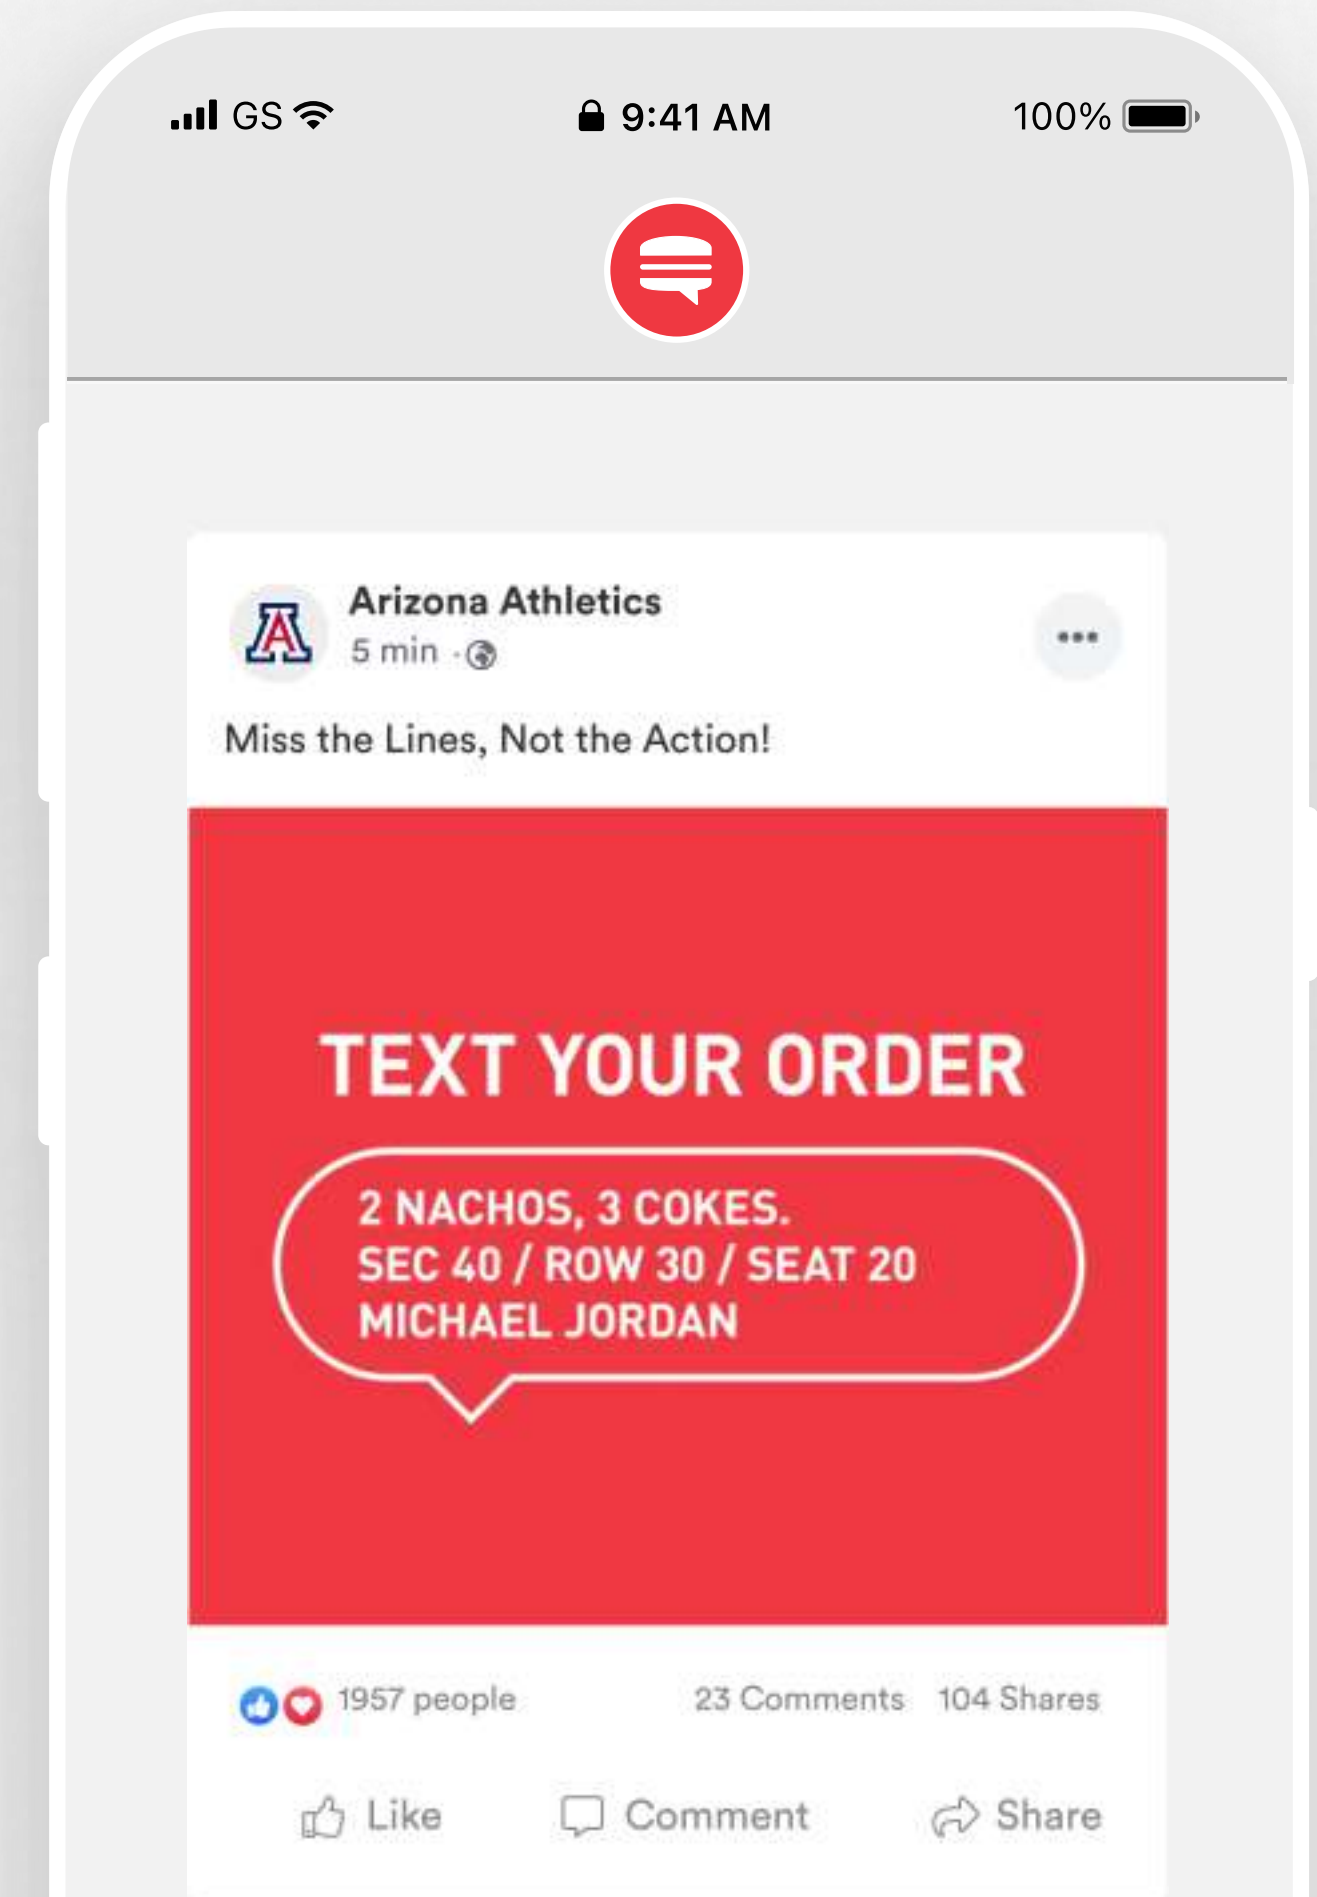

Venues will be provided 1 uniform for every 1,000 seats

DIGITAL MARKETING COLLATERAL

In order to promote and build buzz for the service prior to the game, venues will be provided with:

- Flyer Designs for Print
- Email Templates to Send to their Fans
- A YouTube Link to Showcase Customers How the Service Works
- A Video to Promote on their Social Media Channels

TRAINING & ON-SITE SUPPORT

- Venues will be provided with training material to be informed on how to run the service
- Managers will receive a PDF document to help train runners
- Venues will be supported during the first game to ensure the ground staff is comfortable and there are no unforeseen issues running the service

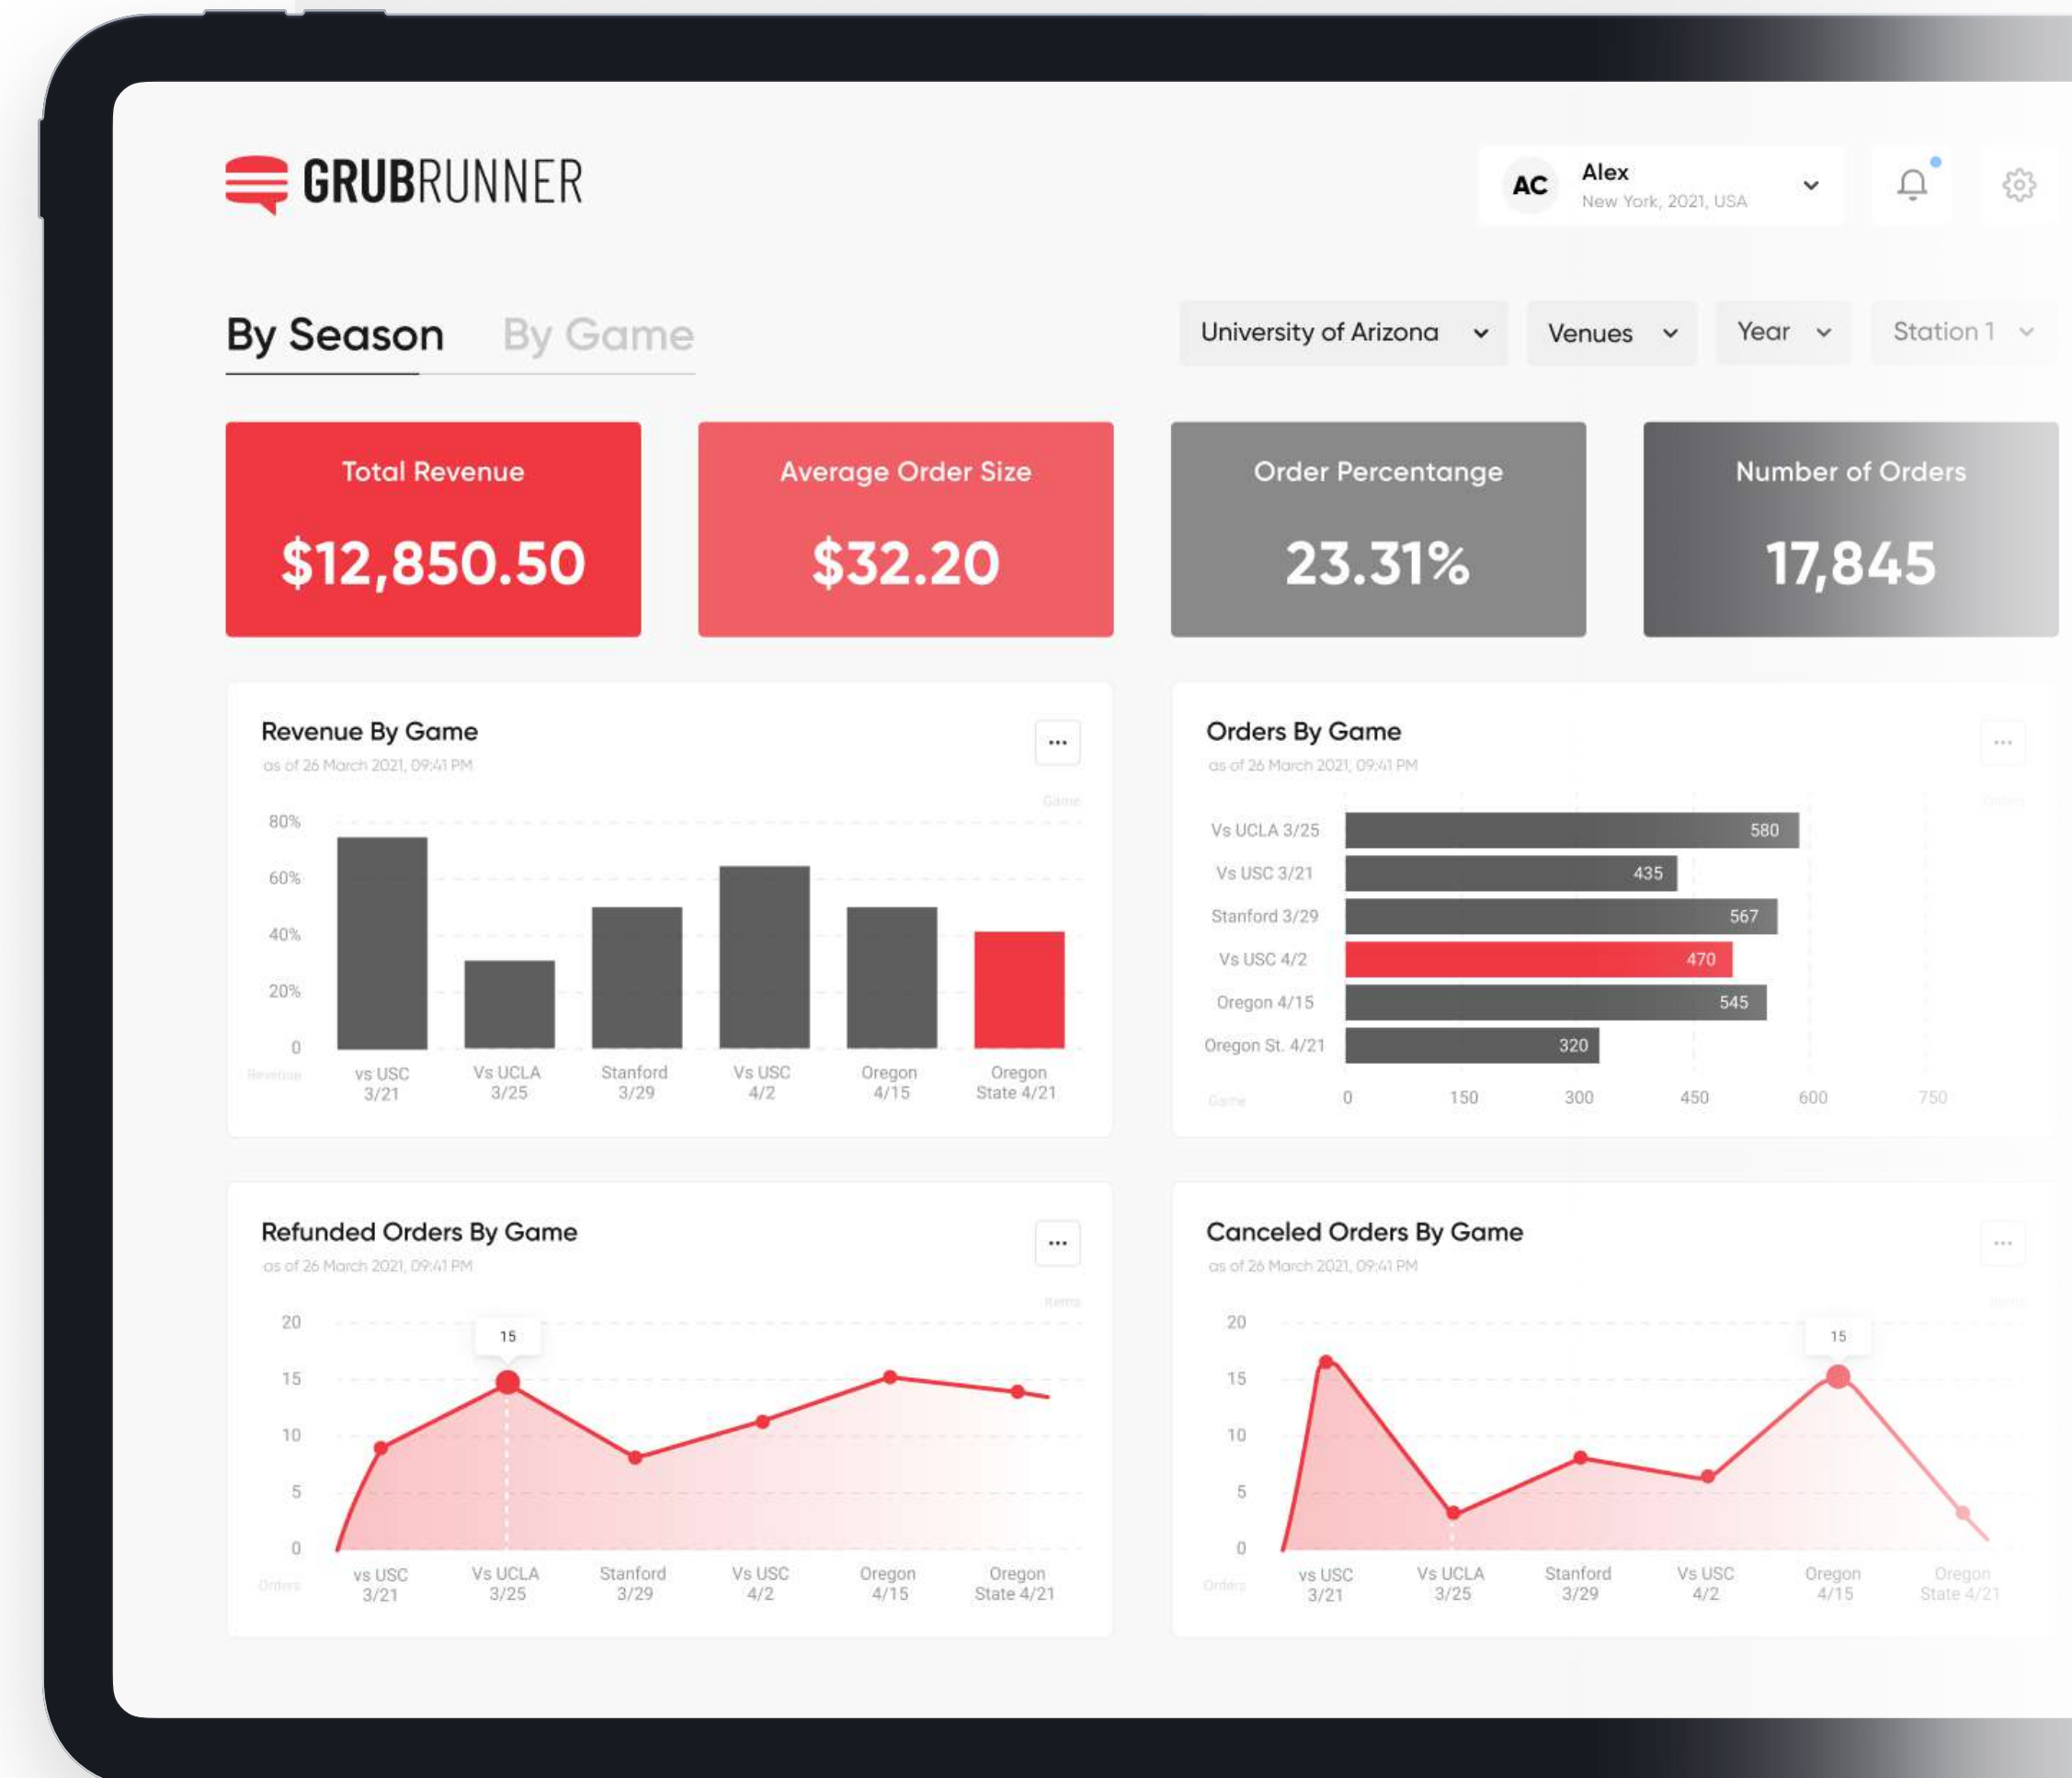

REAL-TIME REPORTING

Venues will be provided a real-time reporting dashboard that will allow them to see sales data in real-time

The reporting dashboard will provide customers data visualizations & key metrics to measure the performance of the service, including:

- Total Sales by Game and by Season
- Total Orders by Game and by Season
- Average Order Size
- Percentage of Customers Ordering
- Frequency of Orders over the Course of a Game
- Top Selling Items
